

HMPP QuickStart Package

What do you get in the package?

- 1 HMPP License
- 1 year Maintenance & Support
- 2 Training Webcasts
- Diagnosis of your application
- 4 Consulting Tokens

Secure your move
to hybrid computing

How does it work?

1- Get your HMPP License

Single User: person using one GPU board in one personal workstation

Five Users: a department cluster (10 to 20 nodes) used only by a research/engineer team with at least a few programmers

2- Get trained on HMPP fundamentals

1st Session:

- Introduction to GPU computing
- Using HMPP features
- Porting methodology

2nd Session (a few weeks later)

- Feedback session
- HMPP advanced use

3- Get a first diagnosis of your application

Share your application on CAPS cluster and get a first preliminary analysis of your problematic. CAPS will help you analyze your application and choose an efficient parallelization strategy.

4- Use your 4 Expertise Tokens* for:

- Parallelization strategy definition
- Implementation strategy and realization
- Performance tweaking

* 1 token = 1/2 day expertise

HMPP QuickStart Package:

**A complete offer of tools and services
to help you quickly deploy your
application on hybrid systems**
